

At Sea

THE DAILY

June 10, 2024

Tonight's Dress: Dressy

Bound for The Great Land

Alaska, known as “the last frontier,” boasts unspoiled habitats including mountains, rich waters, glaciers, and the world’s largest temperate rainforest – the Tongass. This unique and diverse ecosystem supports abundant wildlife, from humpback whales to soaring eagles. You’ll want to lookout for...

Marine Life

Alaska’s waters are teeming with life. The coastline provides a critical habitat for a range of species, several of whom migrate to Alaska in the summer months. Look for orcas, salmon, seals, sea lions, sea otters and more.

Land Animals

You won’t have to look far to find some of the amazing land animals that call the forests and tundra of Alaska home. While many animals can be seen immediately at any port and along the shore, others like the massive moose or stealthy wolves, can be found with the help of local guides or overland tours.

Birds

Juneau boasts nearly 30,000 bald eagles, almost one per resident. You’ll have the opportunity to see majestic Alaskan birds such as puffins, ravens, and arctic terns, which migrate from pole to pole. Keep an eye out for these incredible terns near the Mendenhall Glacier.
